

Break bulk timber exports from New Zealand

24th June 2019

Dear Valued Customers,

As a follow up of our notice on the 07th June 2016 regarding the break bulk timber exports from New Zealand to the Pacific Islands, we would like to remind exporters of the requirements regarding the presentation of the packs for carriage by sea.

The strapping around the timber packs received for export is often insufficient and not suitable for shipping. The thin plastic strapping should be replaced by or reinforced by more suitable strapping as it will reduce the potential of damage to the timber for which we will not accept liability.

Any cost associated with re-packing / re-working & re-strapping of timber packs that are deemed to have insufficient strapping, will be recharged to shippers.

Thank you for your continued support.

Yours sincerely,
Pacific Direct Line
